MAULANA FATIH ABIYYIN

Data Analyst | Time-Series Forecasting, SQL, Dashboarding

Banyumas, Central Java | maulanafatih961@gmail.com | LinkedIn | Portfolio

SUMMARY

Mathematics graduate (GPA 3.57, Universitas Diponegoro) with **7 months** of hands-on data work across two internships. Built a Looker Studio and Power BI dashboard over 9,994 transactions and **$2.30M+** in revenue, cut Banyumas CPI forecast error from **0.25% to 0.16% MAPE** in a published article, and segmented 200 customers with K-Means to target the highest-value group. Works in Excel, SQL (MySQL), and Python, and explains the numbers to non-technical teams.

SKILLS

- **BI, Excel, and reporting:** Power BI, Looker Studio, Advanced Excel and Google Sheets (Pivot Table, VLOOKUP/XLOOKUP, SUMIFS/COUNTIFS), KPI dashboards
- **SQL:** MySQL (schema design, queries)
- **Python:** Pandas, NumPy, Matplotlib, Seaborn, SciPy, scikit-learn
- **Analysis:** EDA, data cleaning and validation, outlier treatment, statistical testing (Pearson, t-test), regression, K-Means clustering, time-series forecasting
- **Other:** SPSS, MATLAB, Adobe InDesign, English (Intermediate)

WORK EXPERIENCE

Junior Data Scientist (MSIB) Aug 2025 – Dec 2025

PT Vinix Seven Aurum – Remote, Indonesia

- Cut outliers in casual rentals **from 44 to 14** on a 731-row daily bike-sharing dataset, by applying 5% Winsorizing (humidity and wind speed outliers 15 to 0) and a log transformation in Python.
- Gave stakeholders one dashboard covering **$2.30M+** in revenue, margin, and segments across **17 product subcategories** and 9,994 transactions, by building it in Looker Studio and Power BI.
- Structured a library website's data (**500+ records** across book catalogs, users, and transactions) into related tables, by designing the **MySQL** schema and writing 50+ queries.
- Pinpointed a high-value segment (20% of 200 customers, **$86K** average income, spending score 81.5) and an under-engaged high-income segment (19.5%, spending score 19.4), by running K-Means (k=5, silhouette 0.417) on age, income, and spending score.

Algorithm and Programming Teaching Assistant Oct 2024 – Dec 2024

Department of Mathematics, Universitas Diponegoro – Semarang, Indonesia

- Raised the average lab score of 50+ students from **70 to 80**, by running weekly Python coding sessions and debugging their code live.
- Cut grading time for 150 assignments by **60%**, by writing automated test cases to run evaluations.
- Produced 4 exam problem sets with 10 test cases each.

Data & Publication Intern Jul 2024 – Aug 2024

BPS - Statistics Indonesia – Banyumas, Indonesia

- Reached **0.25% MAPE** on a 1-month holdout (January 2025) forecasting Banyumas CPI, by building a Double Exponential Smoothing model in Python on 68 monthly records with grid-search tuning of alpha and beta.
- Validated regional survey data for 31 administrative areas before official publication, by running Python and Excel validation.
- Delivered 5 layouts of "Kecamatan dalam Angka" 7 days before deadline, by designing the infographics in Adobe InDesign.
- Finished data processing for 31 administrative areas (27 sub-districts, 4 villages) **7 days early**, by coordinating a team of **10 interns**.

EDUCATION

Universitas Diponegoro – Semarang, Indonesia Aug 2022 – Jul 2026

Bachelor of Science in Mathematics, 3.57/4.00

- **Thesis:** Modeled stock price movement using a Stochastic Volatility Model across 240+ daily trading observations (1-year historical data), validating predictive reliability through dual validation methods.
- **Publication:** *Forecasting the Consumer Price Index in Banyumas Regency Using Double Exponential Smoothing with Proportional Integral Derivative Controller*, Contemporary Mathematics and Applications (ConMathA) (2025).
- **Community Service:** Marginal analysis to improve the efficiency of a seaweed business in Kemujan Village, Karimunjawa (2025), resulting in cost-efficiency strategies and optimal harvest recommendations for local farmers.
- **Award:** Bank Indonesia Scholarship Awardee (GenBI), 2025 – 2026.

ORGANIZATIONAL EXPERIENCE

Staff of Talent and Interest Division Jun 2025 – May 2026
Generasi Baru Indonesia (GenBI)

- Designed and executed 8 development programs to identify and foster the non-academic talents of **150 scholarship awardees**.
- Organized routine sports and recreational initiatives open to all 150 scholarship awardees, engaging 30+ regular participants per session to foster teamwork and solidarity.
- Managed operational logistics for flagship events, including First Gathering and Upgrading, accommodating 150 attendees and 8 supervising lecturers.

Staff of Logistics and Equipment Division Sep 2024 – Feb 2025
Undip's Mathematics Competition (UMC)

- Allocated logistical resources and technical equipment for a national competition engaging **980 participants** across elementary, middle, and high school levels.
- Managed spatial setup and crowd mobilization across 10 examination rooms, a main auditorium, vendor areas, and public facilities on strict operational schedules.
- Monitored 100+ inventory assets and resolved on-site logistical issues in real time throughout event days.

Expert Staff of Student Resource Development (PSDM) Jan 2024 – Dec 2024
Mathematics Student Association Diponegoro University

- Directed the planning and execution of the "Pencerdasan Internal" (Internal Enlightenment) program as Project Officer, securing **100% attendance** from 45 association members.
- Led mentor coordination for SPEKTA MATH 2024, structuring learning modules and directing facilitators to guide 180 freshmen.
- Awarded **Top Expert Staff** in Q3 2024 for modernizing conventional program workflows and successfully delivering two core student development initiatives.

CERTIFICATIONS AND TRAINING

Bootcamp: Data Analyst with SQL and Python in Google Platform (Batch 26) Oct 2026 – Present
DQLab

- In progress: SQL fundamentals with Google BigQuery and Python for data analysis.

Competency Certification: Computer Operation (Website Content Management) Oct 2025 – Oct 2028
Badan Nasional Sertifikasi Profesi (BNSP) - No. 63122 3514.01 0000342 2025

- Certified in website content management under the Computer Operation competency field.
- Assessed against the Indonesian National Work Competency Standards (SKKNI), valid for 3 years.

Workshop: Conquering Universe Full Ineffable of Data with Data Science May 2023
Universitas Diponegoro

- Hands-on training in the end-to-end data processing cycle, using Pandas and NumPy for data manipulation and visualization.
- Applied introductory machine learning algorithms and EDA techniques to find patterns in structured datasets.
