MAULANA FATIH ABIYYIN

Data Analyst | Time-Series Forecasting, SQL, Dashboarding
Banyumas, Central Java, Indonesia | **0895417462070** | maulanafatih961@gmail.com | LinkedIn | Portfolio

SUMMARY

Mathematics graduate (B.Sc., GPA 3.57, Universitas Diponegoro) with **7 months** of hands-on data experience across two internships. Built Looker Studio and Power BI dashboards covering 9,994 transactions and USD 2.3M+ in revenue, reduced Banyumas CPI forecasting error from **0.25% to 0.16% MAPE** in a published journal article, and segmented 200 customers with K-Means to target the highest-value group. Works with Excel, SQL (MySQL), and Python, and explains numbers clearly to non-technical teams.

SKILLS

- **BI, Excel, and Reporting:** Power BI, Looker Studio, Advanced Excel and Google Sheets (Pivot Tables, VLOOKUP/XLOOKUP, SUMIFS/COUNTIFS), KPI dashboards
- **SQL:** MySQL (schema design, queries)
- **Python:** Pandas, NumPy, Matplotlib, Seaborn, SciPy, scikit-learn
- **Analysis:** EDA, data cleaning and validation, outlier handling, statistical tests (Pearson, t-test), regression, K-Means clustering, time series forecasting
- **Other:** SPSS, MATLAB, Adobe InDesign, English (Intermediate)

WORK EXPERIENCE

Junior Data Scientist (MSIB) Aug 2025 – Dec 2025
PT Vinix Seven Aurum – Remote, Indonesia

- Reduced casual rental outliers **from 44 to 14** in a 731-row daily bike rental dataset, using 5% Winsorizing (humidity and wind speed outliers from 15 to 0) and log transformation in Python.
- Delivered a single stakeholder dashboard covering **USD 2.3M+** in revenue, margin, and segments across **17 product subcategories** and 9,994 transactions, built in Looker Studio and Power BI.
- Structured library website data (**500+ records** of book catalog, users, and transactions) into relational tables, by designing a **MySQL** schema and writing 50+ queries.
- Identified a high-value segment (20% of 200 customers, average income **USD 86K**, spending score 81.5) and an under-engaged high-income segment (19.5%, spending score 19.4), using K-Means (k=5, silhouette 0.417) on age, income, and spending score.

Teaching Assistant, Algorithms and Programming Oct 2024 – Dec 2024
Department of Mathematics, Universitas Diponegoro – Semarang, Indonesia

- Raised the average lab score of 50+ students **from 70 to 80**, through weekly Python coding sessions and live debugging.
- Cut grading time for 150 assignments by **60%**, by writing automated test cases to run the evaluations.
- Prepared 4 exam sets, each with 10 test cases.

Data and Publication Intern Jul 2024 – Aug 2024
BPS (Statistics Indonesia) – Banyumas, Indonesia

- Validated regional survey data for 31 administrative areas before official publication, using Python and Excel validation.
- Completed 5 "Kecamatan dalam Angka" (Districts in Figures) layouts 7 days ahead of the deadline, by designing infographics in Adobe InDesign.
- Finished data processing for 31 administrative areas (27 districts, 4 villages) **7 days early**, by coordinating **10 fellow interns**.
- Extended the internship data into a field work practice (PKL) research project, presented in April 2025: built a Double Exponential Smoothing model in Python on 68 monthly Banyumas CPI observations with grid search for alpha and beta, achieving **0.25% MAPE** on a 1-month holdout (January 2025).

EDUCATION

Universitas Diponegoro – Semarang, Indonesia Aug 2022 – Jul 2026
B.Sc. in Mathematics, GPA 3.57/4.00

- **Thesis:** Modeled stock price movements with a Stochastic Volatility Model on 240+ daily price observations (1 year of historical data), and validated prediction reliability with two validation methods.
- **Publication:** *Forecasting the Consumer Price Index in Banyumas Regency Using Double Exponential Smoothing with Proportional Integral Derivative Controller*, Contemporary Mathematics and Applications (ConMathA) (2025).
- **Community Service:** Marginal analysis to improve the efficiency of seaweed farming in Kemujan Village, Karimunjawa (2025), producing cost-efficiency strategies and optimal harvest recommendations for local farmers.
- **Award:** Bank Indonesia Scholarship (GenBI) recipient, 2025 – 2026.

ORGANIZATIONAL EXPERIENCE

Staff, Talent and Interest Division Jun 2025 – May 2026
Generasi Baru Indonesia (GenBI)

- Designed and ran 8 development programs to identify and nurture the non-academic talents of **150 scholarship recipients**.
- Organized regular sports and recreation activities open to all 150 scholarship recipients, with 30+ regular participants per session to build teamwork and solidarity.
- Managed operational logistics for flagship events, including First Gathering and Upgrading, with 150 participants and 8 faculty mentors.

Staff, Logistics and Equipment Division Sep 2024 – Feb 2025
Undip's Mathematics Competition (UMC)

- Allocated logistics resources and technical equipment for a national-level competition with **980 participants** from elementary, junior high, and senior high school levels.
- Arranged venue layout and crowd flow across 10 exam rooms, a main auditorium, vendor areas, and public facilities under a strict operational schedule.
- Tracked 100+ inventory assets and resolved on-site logistical issues in real time during the event.

Expert Staff, Student Resource Development (PSDM) Jan 2024 – Dec 2024
Mathematics Student Association, Universitas Diponegoro

- Led the planning and execution of the "Internal Enlightenment" program as Project Officer, with **100% attendance** from 45 association members.
- Led mentor coordination for SPEKTA MATH 2024, preparing learning modules and guiding facilitators to mentor 180 new students.
- Received the **Best Expert Staff** award in Q3 2024 for modernizing program workflows and completing two student development initiatives.

CERTIFICATIONS AND TRAINING

Bootcamp: Data Analyst with SQL and Python on Google Platform (Batch 26) Oct 2026 – Present
DQLab

- In progress: SQL fundamentals with Google BigQuery and Python for data analysis.

Competency Certification: Computer Operation (Website Content Management) Oct 2025 – Oct 2028
National Professional Certification Agency (BNSP) - No. 63122 3514.01 0000342 2025

- Certified in website content management under the Computer Operation competency field.
- Assessed against the Indonesian National Work Competency Standard (SKKNI), valid for 3 years.

Workshop: Conquering Universe Full Ineffable of Data with Data Science May 2023
Universitas Diponegoro

- Hands-on training in the end-to-end data processing workflow, using Pandas and NumPy for data manipulation and visualization.
- Applied basic machine learning algorithms and EDA techniques to find patterns in structured datasets.
